

PROCRIMP

POWERED CRIMPING TOOL

STRAINRITE FENCING SYSTEMS are proud to partner with INFACO to release a game changing crimping tool attachment for the latest standard in professional electric pruning secateurs, the Electrocoupe F3020 & the Electrocoupe F3015

FEATURES

- Battery-powered crimping tool, designed for use in the agricultural and horticultural industry
- The crimp tooling is a multipurpose tool as it is designed to be interchangeable with pruning shears, fitting onto a high-performance powered pruning tool
- The Procrimp tool is lightweight and enables single-handed one-finger trigger operation, freeing up the operator's other hand to hold the wire and as the tool is powered, it eliminates the hard physical work to complete the crimp operation
- Enables faster and significantly more ergonomic solution for crimp joining compared to current options

PROCRIMP

POWERED CRIMPING TOOL

COMPATIBLE WITH
INFACO F3020

26/09/2023

WWW.STRAINRITE.CO.NZ

ASSEMBLY

Assembly is easy and can be completed in 5mins

Contents

- 1 x Procrimp Jaw
- 1 x Allan Key
- 1 x Allan Key Extender
- 2 x Small Screws
- 1 x Infaco Maxi Guard

You will need

- 1 x Posi Screw Driver

STEPS

- Remove cover screws & the cover.
- Install Maxi Guard and the shorter screws provided
- Flip over and remove small guard & 2 torx screws
- Install Procrimp assembly head. The gear teeth should mesh together nicely.
- Align the first right side hole position, replace torx screw with provided allen key to loose tight.
- Position second hole insert torx screw. Tighten both screws and put guard back in place.

UPDATE NEEDED

Once the Procrimp has been fitted to the F3020, a software update to version 4.4 Is required to optimise the safety parameters.

Please check your unit is running the latest version. Refer to your Infaco User Manual for update instructions.

CRIMP RANGE

ORIGINAL NZ EZEPULL™ CRIMP SLEEVES

Use only strainrite wire crimps with these tools for quick, permanent joints on all common sizes and types of fencing wire.

Each wire joining crimp has a water-resistant grit adhesive for all-weather application for a sure fast wire grip.

Crimp joints when using the procrimp with strainrite 2.5mm or 3.15mm crimp sleeves exceed breaking load of wire. *

Warning

Using 3rd party crimps will void the warranty.

2.5mm (12½ SWG) Crimp Sleeves

For use on 1.6mm - 2.5mm (16-12½ SWG) fencing wire.

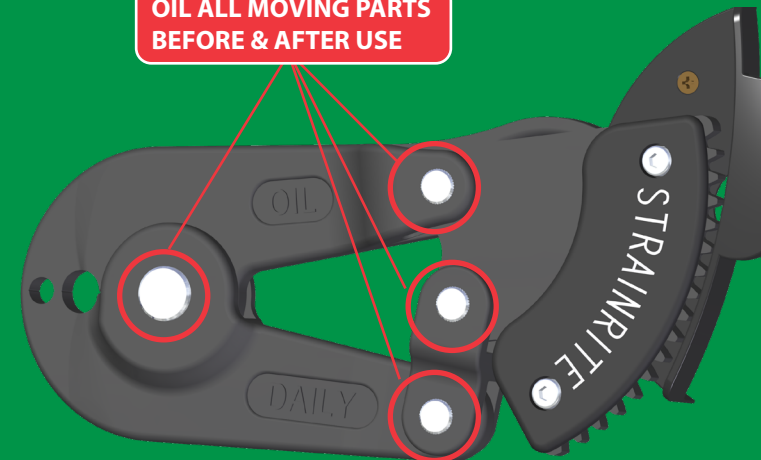

3.15mm (10 SWG) Crimp Sleeves

For use on 3.15 (10 SWG) fencing wire and 1.6mm HT barbed wire

MAINTENANCE

It is vital that the tool is oiled regularly on all moving parts using a quality high pressure lubricant. Some parts of the the tool achieve several tonnes of pressure and regular oiling is required to stop the tool from seizure, accelerated wear and damage to the handset.

OIL ALL MOVING PARTS
BEFORE & AFTER USE

HOW TO CRIMP

Crimp 4-5 times from one end to the other overlapping each bite to eliminate shoulders. You can view the instructional videos and more by visiting www.strainrite.co.nz
